

# api/customer/orders

## Запрос списка заказов

GET

api/customer/orders

Метод возвращает список заказов текущего покупателя.

### Пейджинация

Для пейджинации используются параметры page и size: size - записей на странице, page - номер страницы.

Пример: `api/customer/orders?page=0&size=200`

Если параметры не переданы, то дефолтные значения page=0&size=10

Также, для отображение пейджинации следует анализировать параметр recordsTotal, возвращающий общее количество записей (с учетом примененной фильтрации, если она есть).

### Пример результата запроса

```
{
